DLNA network with smartphone App

The Internet radio DR 470 supports the DLNA function: through DLNA you are able to control several functions of the radio on your smartphone via app. For example you can switch between radio stations or change the volume.

During music playback the logo of the radio station or the album cover of the played song will be displayed. You are also able to stream music directly from your smartphone to the DR 470.

Examples: Screenshots Apps „Bubble UPnP“ and „media U“.
