

D5A 11W - Directional 5G Antenna

Art. Number 109601

Directional antenna for 4G/5G signal reception.

Future-proof connectivity, wherever you are

Work, rest or play online reliably and quickly, wherever you're staying - TRIAX 5G antennas boost mobile broadband reception in places fibre doesn't reach.

Simply connect to your choice of mobile broadband router to receive the maximum attainable mobile network speed at each location. The 11 dB gain ensures outstanding signal quality.

The antennas are ready for the advancing 5G roll-out across Scandinavia, bringing speeds up to 100x faster than 4G. They are fully compatible with all mobile signals: use the best possible 4G LTE speeds now, with no need for future upgrades when 5G arrives.

For the ultimate in speed and reliability, our antennas are MIMO compatible. We recommend installing a pair of directional antennas 70 cm apart and at 45° opposing angles.

The antenna is delivered with 7m white cable with connector, which is ready for mounting directly on the router.
