PREMIER HAZARD LTD Tel: +44 (0)113 239 1111 E sales@premierhazard.co.uk

The Department of Transport / Highways Agency Chapter 8 (Summary) requires that any vehicle stopping on the highway, for working or inspection purposes, must have fitted two independent Amber Beacons or a Lightbar with at least two light units complying with ECE Regulation 65.

For further information or assistance with this please contact out internal sales team.

Resourceful, reliable and responsive

Founded in 1983, Premier Hazard is renowned for being one of the world's leading manufacturers of innovative lighting and warning systems, for a variety of applications.

Premier Hazard provides solutions to its customers, who include Emergency, Rescue, Utility and Recovery Services, for all vehicle hazard-warning requirements.

With a worldwide customer base, covering more than 100 countries, quality is of paramount importance for all equipment supplied.

Premier Hazard is the only UK hazard warning equipment manufacturer, with a full suite of in house test facilities, including Photometric, Vibration, Water Ingress, Salt fog, Humidity and Hot/Cold chambers all of which are used to ensure products meet and exceed required European regulations and our own exacting quality standards.

With new technology accelerating change in all main sectors, Premier Hazard has to be one step ahead, to ensure it can always provide the latest solution, purposely designed, to meet the challenging demands of its many customers. This is why the Premier Hazard product range is always developing, to include the latest technology for Lightbars, LED lighting, Sirens and speakers, control systems, along with Vehicle mounted Camera and Digital Video Recording systems.

Light Intensity Measurement

EMC Approvals

Our products are approved to EMC EC Directives and ECE Regulations. Other EMC approvals can be obtained if required.

 $\mathbf{2}$

TRICORE

The Defender lightbar features the truly unique TriCore™ technology, which constitutes a quantum leap forward in signal brightness – far exceeding the intensity and quality of any system.

Over twice

as bright as

any other

Lightbar

Unlike traditional LED lightbars that drop off at key angles, TriCore™ maintains it's astonishing visibility a full 360 degrees.

This is significantly safer and offers increased visibility to drivers at all angles. It also provides greater distance visibility for approaching drivers allowing for more reaction time.

This means that whether you're moving in pursuit mode, through narrow roadways or stopped in a difficult and challenging position on a side road or busy highway, - the new TriCore™ light technology will offer greater protection and confidence than any other product!

The Defender lightbar offers fantastic brightness and will directly assist in

warning and clearing traffic in any weather conditions. At the 45° key 'intersection angle' it is 21/2

times brighter than any other lightbar, providing extra lighting warning and protection where it is needed most, allowing the officers greater confidence at areas of limited off-angle visibility.

It has a 'weather seal' that protects the components from the rain, spray, traffic grime and algae build-up.

Improved thermal management within the Defender lightbar also ensures all

> components are kept cooler than any other lightbar in the market, reducing the risk of operational failures that can compromise officer safety.

With the addition of dimming mode for night time activity the Defender lightbar offers an unequalled level of hazard warning.

Being totally modular, it is available in a variety of sizes from 23" up to 94" in

Available Lengths: 23", 35", 44", 47", 52", 58", 70", 80", 94"

2.5" Height: Diameter: 13.5"

- Unique patented lighthead display using TriCore™ Technology
- 7000 candela at peak intensity
- 2-2.5 times brighter that any top end lightbar on the market at 45 degree and 60 degree intersection angles
- Intensely brighter alley and takedown lights than traditional halogen or LED
- 2 times brighter signal from rear of lightbar
- Improved central control activity
- Dimming Mode
- Improved thermal management, reducing component failures
- Modular lens design

Versatile, Two Layer or Single Deck Lightbar

Available options

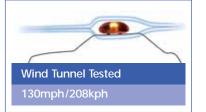

- 360° and standard LED options
- Low profile, two layer aerodynamic design
- Polycarbonate lens
- Effective lens seal
- Designed to use latest intensity LED directional lights
- Halogen and strobe options available
- Can be built as a single layer lightbar
- Rotating flash pattern available with new 360 degree LED's
- Reg 65 Class 1 Blue options

Optional bespoke lettering, logo's and a variety of non standard options are available for all Premier Hazard Ultimax lightbars.

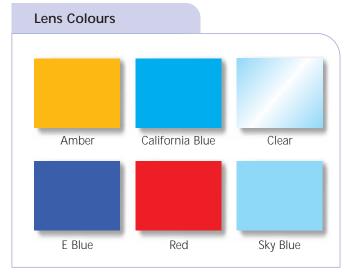

TriCore™ lighthead available for complete bar configuration only.

Traffic Max II

Featuring Leading Edge Prism LED Technology

One of the brightest lightbars on the Market

LIGHTBARS

POLICE

The Traffic Max II features an incredibly bright light output, using latest Prism LED technology, in an ultra-sleek, strong design. Available in sizes 22" to 80"

Standard 44" Model

Height:	69mm
Width:	310mm
Length:	1118mm (44")

It uses the super bright Prism reflector LCD unit with a five year guarantee. It is totally encased in a strong, fully tested polycarbonate enclosure that protects all components from water ingress, dirt, grime and other corrosive elements associated with everyday usage of high performance traffic vehicles.

Optional LED Alley and Take Down Lights

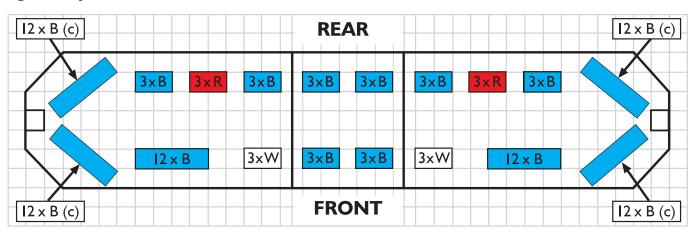

- Exceptional light output, using latest generation LED's
- Low Amp draw
- Extruded aluminum frame
- Clear Polycarbonate lenses
- Available in flashing or Steady-Burn versions
- Ultra-low profile
- Mounting kits available separately

The Shape You Can Trust

LIGHTBARS

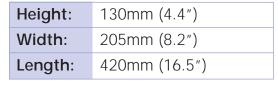

There's nothing like the dual-decks of the MX 7000® for giving you the power and flexibility to get everything you want from a performance lightbar. You get primary unobstructed signal protection from upper-deck rotators and mirrors, while the lower-deck is dedicated to providing a variety of special purpose lights - including the highly acclaimed built-in ArrowStick®.

Height: 146mm (5.75") 311mm (12.25") Width: Length:

- UV stabilised polycarbonate lenses
- Flexible magnetic mounting with additional suction suitable for curved or flat roofs, Halogen only
- Colours: Amber, blue, clear, green, magenta & red (magenta not approved for European use at time of publication)
- Single voltage application: 12v rotators 55w bulb @ 4.5 amps 24v rotators 70w bulb @ 3.0 amps

The Info Sign is a rear deck message sign providing roadway communication to approaching traffic. It is a complete warning package including arrow warnings (left, right, centre out and flash), flashing text and scrolling text displayed using a high-intensity LED array. The sign is highly visible in bright sunlight and incorporates a dimmer function for night-time use.

In addition to low current draw, one of the LED's features is a long life performance rating of over 100,000 hours. Solid state LED design ensures durability against road shock and vibration providing low maintenance and extended life span. Can store up to 80 programmed messages incorporating both text and symbol. Messages can be displayed both fixed, flashing or scrolling. Quick, push button, message selection. Motorised activation allows unit to remain concealed until the sign is activated. Available for pop up or pop down positioning and in 'stand alone' format for light bar mounting.

Controller and 18" cable included. CD Rom for programming.

Quick Release Connectors

Allows you to separate a vehicle's lightbar from its cable with a quarter turn of the connecter.

- A gasket provides a seal between the housing and the vehicle roof.
 Connector assembly includes a rubber boot, which provides a watertight seal over the connectors once attached, and a plastic loom, which protects the wires entering a lightbar.
- Connector housing is permanently mounted to the rooftop of the vehicle with four screws and protects the female end of the 23 pin connector.

Less than 1amp

current draw

- Suitable for battery powered vehicles
- Voltage range 12-80V DC, 470 AC operates at 120V AC
- Lens colours: Amber, blue, clear, green, red
- Low consumption 0.1 - 0.4 amps

Diameter:	76mm
Height:	127mm
Weight:	0.28ka

Low profile dimensions

Height:	117.5mm
Diameter:	161.4mm

High profile dimensions

Height:	166.7mm
Diameter:	161.4mm

- 160 flash per minute high intensity double flash strobe beacon
- UV stabilised polycarbonate fresnel lens
- Lens colours: amber, blue, clear, green, red
- Single voltage application: 12v strobe head 1.6amps 24v strobe head – 0.8amps
- All beacons polarity protected and have RFI suppression
- Available in 12 or 24 volt

LED's the Future

The slimline, low weight nature of LED's opens up a wide range of design and installation opportunities for all types of vehicle.

The high intensity of LED light is an added bonus for the emergency utility services, as it increases the warning of a hazard to other road users.

Benefits:

- Low energy draw giving minimal drain on vehicle battery
- 'Fit & Forget' No bulbs to change
- Totally sealed against water and dust ingress
- 100,000 hours service life
- 5 year warranty on LED's
- Ideal for covert and directional lighting

Hide Away LEDs

Features

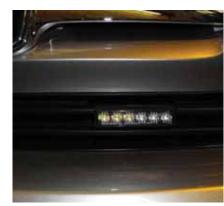

- 70 flashes per minute minimum. Fast rate is 100 flashes per minute.
- 12v DC, 1 amp maximum.
- "3' LED module to provide spectacular
- Virtually maintenance free rugged and reliable LED performance.
- Nearly impossible to detect in side markers or tail lights until activated.
- Flasher is potted for weather protection and suitable for trunk or under-hood mounting.
- Up to 15 user-selectable flash patterns.
- Designed to be installed in rear light clusters without need to cut into existing wiring.
- No need to remove existing bulbs ideal for covert and overt.

Speakers

The 8000 series is a modular approach to siren & lightbar control.

8000 Series

Power module

Dimensions: 208mm x 163mm Depth: 47mm Weight: 800g

All amplifiers

Features:

- Standby current meets automotive standard of less than 0.3 milliamps
- Low current Master Switch.
- Custom designed heat sink assembly.
- All models can drive 2 x 100 Watt loudspeakers over full temperature range.
- Siren Running Output with current monitor facility.
- Battery voltage monitor and shutdown.
- Output power reduction to reduce power to loudspeaker.
- High speed fan with controller.
- Self resetting circuit fuses.
- Faster short circuit performance.
- More robust construction.
- Relay output.
- Sidelights input.

Basic amplifiers, 8004

Features:

Run Input.

Amplifiers with audio facility, 8005

- Same amplifier for all applications.
- State of the art Digital Signal Processor (DSP).
- Digital audio amplifier.
- CANBUS
- Noise cancelling electret condenser microphone.
- 20 second speech record facility.
- Two auxiliary audio inputs.

Diagnostics

Benefits:

Will not flatten battery, even over extended periods.

Economical switch can be used to disable system if desired.

Superior performance in tropical conditions.

Single model for standard (/T) and High Power (/H) applications.

Connects straight to Data Logger where required.

For added dependability, output is only present when loudspeaker operational.

Prevents operation of amplifier when battery voltage goes too high or too low. 12 volt amplifier will not be damaged if connected to 24 volts.

Avoids damage to loudspeaker when voltage rises due to fast charge or in the event of regulator malfunction.

Variable fan speed dependent on operating conditions.

Reduced down time for maintenance.

Greater protection for output transistors.

Control of one external function with simple addition of one relay.

Benefits:

■ Universally compatible with alternative switching systems

Available with 7000/8000 amplifier conversion loom.

Reduced stock. Flexibility to change or add to system.

Low frequencies prevented which could damage loudspeaker.

Better sound reproduction.

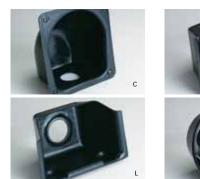

Clearer audio in Public Address mode under noisy conditions.

Standard in all amplifiers (use dependent on Control Panel).

Allows for multiple inputs on same application e.g. Broadcast Radio, Two way radio, MP3 player, Cassette player etc.

Voltage, temperature and fault information available on suitable Control Panel.

Speaker Cowls & Extension Kits

When ordering please note that the model numbers include the driver size and type of cowl e.g. P100-S is a P100 speaker with an S cowl.

С	Concealed speaker cowl for mounting behind grille or bumper
F	Flared speaker cowl for roof mounting
L	Lightbar cowl for mounting in lightbars
M	Medium cowl for compact applications
R	Round cowl for roof, behind grille or motorcycle mounting.
S	Rectangular cowl for roof or behind grille mounting
P16E	Extension kit for remote mounting of the driver from the cowl assembly (C, R & S cowls + M, L, F)

Fitting Options

Speaker Drivers

PA35	35w speaker driver	
	(for use with 6002 amplifier)	2.35kg
PA60	60w speaker driver	2.30kg
PA100	100w speaker driver	2.80kg
PA100-RB	100w chromed speaker roof mount	5.12kg
PA100-L	100w Slimline speaker and cowl	5kg

Technical Specification of Amplimax Sirens

12v 11 to 16v DC or 24v 22 to 32v DC Voltage: Standard 60w/100w 1 to 11 Ohm Loudspeaker Outputs: High power 200w 2 to 11 Ohm Loudspeaker (7000 Series) Power at 12v: 5.8A-60w, 10A-100w, 20A-200w

Oper Temp: -30 °C to +50 °C

Audio

- Frequency range: 300 to 10,000 Hz
- Distortion (300 to 3,000) less than 5%
- P.A. Output regulated to 60w
- Radio input impedance: 3.2 to 2,000 Ohms
- Microphone: Electronic microphone

Spare Part:

6000 to 7000 Conversion Loom: Part Number 507147

STC & MTC Controllers

The ultimate solution for all vehicles

Multitouch Controller

- High power switching, no extra fuses and relays required for outputs.
- All output fuses on back unit for easy maintenance. LED status indicator for fault finding on each output.
- Small size for backboard installation.
- Plug and play system for ease of use.
- Unit integrates with 8000 siren system.
- Lockable programming at installation stage stops programming being changed in vehicle.
- Built-in arrowbar controller on larger version saving time on installation. No extra controller to fit.
- Selectable audible warning to indicate output(s) enabled
- Non damaging mounting bracket for easy installation.

- Built in microphone.
- Large positive action keys.
- Back lit.
- Automatic light sensor.
- Universal mounting bracket.
- Polarity protection with LED indicators.
- Fused output.

Speedtouch Controller

The kit comprises of:

- Handset
- Rear control box
- Control box connectors
- Curly cord
- 6 way extension cord
- 6 way handset interface
- Detailed instruction leaflet

620 Flasher Unit

The following units can be used to control directional lights, headlights, fog lights etc. or a combination. (e.g. Headlights and a pair of grille lights).

Popular Models

Electronic alternating flasher 2 x 10 amps (max). Dual Voltage

620-102

Electronic headlight pulsating flasher 1 x 10 amps (max). Dual voltage

620-103

Electronic headlight alternating flasher unit. 12v or 24v

620-103K

Electronic headlight alternating flasher kit, includes relays. 12v or 24v

620-103KI

Electronic headlight alternating flasher kit, includes relays and a side light override. 12v or 24v

Electronic headlight alternating flasher and one set of auxiliary alternating outputs. 12v only

Electronic alternating flasher with steady override, can be used on fog lights. 12v only

Electronic headlight pulsating flasher, includes a set of auxiliary alternating outputs and a side light override. 12v only

562506-12v

30A Changeover relay

Popular Models

Solid state alternating flasher unit 2 x 8 amps (max)

Solid state alternating flasher unit 2 x 8 amps (max) 12v or 24v. Programmed with various flash patterns

Solid state alternating flasher unit 2 x 8 amps (max) 12v or 24v

More varied flash patterns available

Solid State Flasher Units

Popular Models

Solid state alternating flasher unit 2 x 8 amps (max). 12v only

ETAF08-24P

Solid state alternating flasher unit 2 x 8 amps (max). 24v only

Solid state alternating flasher unit 2 x 15 amps (max). 12v only. To suit four lamps

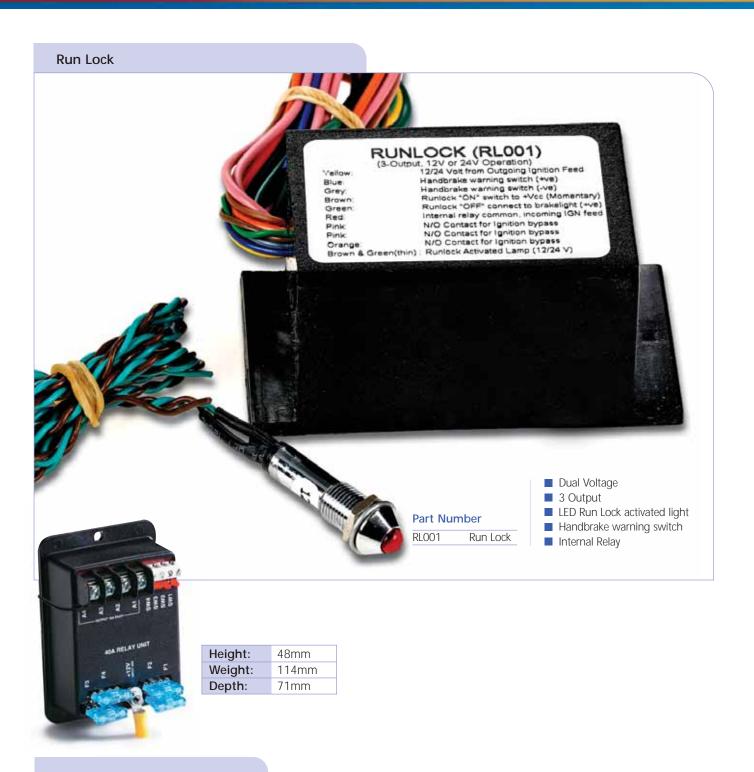

ETAF15-24P

Solid state alternating flasher unit 2 x 15 amps (max). 24v. To suit four lamps

Strobe Power Supplies

AUXILIARY ITEMS

- 444-
- 4 x 10A relay power distribution unit. 12v positive switching. Integral fuses

- Strobe power supplies carry a two year warranty and feature polarity protection, continuous duty circuitry, RFI filters to protect against radio interference and are vibration resistant.
- All units are potted for improved durability

Flash Patterns

Double Flash

The standard double flash pattern used by emergency services throughout the world.

Four Flash

An attention catching powerful 4 flash pattern that is more distinctive than the standard double flash.

Five Flash

The Five Flash can flash so rapidly that the lamp appears to burn continuously in a pattern of 5 powerful flashes which is highly distinctive.

Warp Flash

Super Flash has an outstanding flash rate of 700 flashes per minute to produce the ultimate warning pattern.

Dome Camera Lightbar

Mobile Video/CCTV Solutions

The fully functional 360° pan and tilt Camera Bar has been integrated into a vehicle's roof mounted lightbar. The 360° Dome Camera bar provides security and emergency services with high performance all round surveillance, with the added safety benefit of leaving the dash and windscreens uncluttered

The micro Zoom Camera is the latest generation video camera. Compact in design, it fits neatly behind the rear-view mirror and measures only 85mm x 50mm x 50mm - and with its compact size, the Zoom Camera comfortably fulfils the requirements of VOSA by allowing unimpeded vision through the swept area of the windscreen.

Additionally, the unique rear-view mirror monitor available as part of the mobile

CCTV system is specifically designed to work in conjunction with the Zoom Camera. Incorporating a 4 inch TFT LCD, the mirror monitor delivers high definition video pictures to the operator and with its dual function design. keeps the dashboard area uncluttered and free from unnecessary equipment intrusion.

Depending on performance required, the same Zoom Camera can be alternatively mounted to the rear screen, the picture being transmitted to the rear view mirror monitor and available by simply switching camera 'channel'. Various camera specifications are available. For example, operators requiring a fixed focal length camera, to act as a simple vehicle reversing aid, can opt for a camera system tailored to meet that requirement.

Video data can be readily downloaded from the hard drive onto compact flash card, on-board pc or separate laptop. By specifying an alternative to the existing micro DVR, operators can also transmit 'live' pictures and video to a remote location via 3G.

360° Dome Camera Bar

Spec	ifica	tions
------	-------	-------

Specification	S
Mechanical	Tilt Angle 12° below and 45° above horizontal
	Rotation 360° continuous
	Drive Method Belt/direct drive DC motor
Construction	Top cover ABS/Acrylic
	Mounting Type Light Bar only
	Cabling Pre-wired
Comms.	Telemetry Type RS485 twisted pair
Dome Speed	Variable Speed 3 axis
Finish	Standard Black Finish
Camera	Video Format-PAL
Specifications	Sensitivity 2 lux colour, 0.05 lux Mono
	Horizontal Resolution 460TVL
	Effective/Total Pixels 740k
	Shutter Speed Auto 1/3 > 1/10k
	Image Sensor Format 1/4" CCD
	Lens F1.6 to F=3.8
	Angle of view approx' 42° wide, 1.6° tele
	Zoom Ratio (optical) 26:1 (optical)
	Digital zoom 12x
	Focus Auto with manual override
	Iris Auto with manual override
	Gain Auto
	S/N Ratio >50dB
Image Stabilisation	90%@10Hz

Incorporating into the Optimax light bar, one of the most popular lightbars on the market. The pan and tilt 360° Dome Camera is suitable for use over a wide range of vehicles. The elevated light bar position affords it an uninterrupted 360° view.

Using the compact joystick, the operator has complete control of what the Dome Camera sees when it sees it. The pan and tilt functions can be operated at speeds of between 1° and 30° per second, allowing you to monitor your target with unrivalled accuracy. In addition, the 26:1 optical zoom and 12 x digital zoom lens offers an image far beyond the capability of most standard CCTV packages.

Crowd monitoring, covert surveillance, incident recording or as a health and safety tool: whatever the situation, you can rely on the 360° pan and tilt Dome Camera to do its job.

Mobile Video/CCTV Solutions

CAMERA EQUIPMENT

3G Digital Video Recording

3GMDVR is a robust video recording server designed for fleet security applications. By using the award-winning SMAC-M multi-streaming video compression technology, 3GMDVR delivers no compromise performance on simultaneous recording and transmission via a mobile network.

- <u>Features</u>
- 4 video, 16 alarm inputs; 4 relay outputs.
- Recording up to 25/30fps on D1; 100/120fps on CIF resolution.
- Live monitoring via HSDPA, UMTS, EDGE and GPRS (require mobile data modem).
- Playback and video extraction via WiFi (require WiFi gateway).
- Fast detachment and shock protection design.

3GMDVR can continuously record videos of every single detail during the vehicle in service. By connecting 3GMDVR to a mobile data modem, the driver can push a button to trigger the 3GMDVR to send an alarm and seamless video back to the central monitoring station via mobile networks such as HSDPA, UMTS, EDGE or GPRS in an emergency situation. In conjunction to a WiFi gateway, the recorded data can be reviewed and extracted to the central storage server via a WiFi network after the vehicle returns back to the depot.

Traditional Video Coding Technology: M-JPEG, MPEG-4

SMAC-M: Multi-stream Video Coding Technology

Good quality recording requires high bit rate which results in poor remote performance. Fast remote transmission is achieved with very high compression rate which inevitably degrades the video recording quality. The bursty channels often affect recording performance.

To solve the conflict, SMAC-M is the first to provide independent multiple streams covering different bit rates. SMAC-M lets you view live video from Video Recording Servers and Network

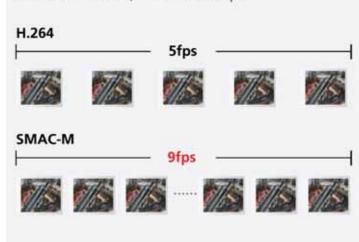

Cameras via LAN, ADSL, PSTN and mobile networks whilst recording in DVD quality on your local devices.

SMAC-M:

Transmits 80% faster

than H.264 on ADSL

Resolution: 720x576; Data Rate: 128kbps

SMAC-M: Records 29% longer

than H.264

Hard disk size: 1000GB; Resolution: 720x576; Rate: 25fps

Remark: The above measurement is based on a set of standard videos. Actual recording size and transmission frame rate is subject to actual camera situation.

We can offer an installation service if required.

Based in Yorkshire, Premier Hazard has the leading in-house emergency services lightbar manufacturing operation in the UK. Products and whole systems can be fitted 'on site' or 'off site', depending on each client requirements.

Emergency equipment can be installed on respective emergency response vehicles in line with the PITO (now NPIA) Framework Agreement. All work is fully guaranteed, in line with the quality products used.

Premier Hazard is one of most established and trusted designers and manufacturers of lightbars and associated equipment in the world. As a part of the worldwide PSE Group, quality and value for money are pre-requisites in everything that we do.

UK Service and Maintenance

Service and maintenance is available via Premier Hazard's Approved Service Technician network, in association with our own mobile field service personnel.

We have one of the largest product stockholdings within the industry, and are able to offer a 48 hour delivery from order with most products; sometimes faster!

Premier Hazard, the premier service provider within the emergency services market!

Warranty

(The following is an extract from our terms and conditions, a full copy of which is available upon request)

Where PH is not the manufacturer of the Goods PH will endeavour to transfer to the Buyer the benefit of any warranty or guarantee given by the manufacturer.

In respect of Goods manufactured by PH, PH will, within a period of 24 months from the date of them being put into use,

by the end user, repair or at its option, replace any Goods which are proved to the satisfaction of PH to be defective in material or workmanship provided that this obligation will not apply where;

- a. the Goods have been altered in any way whatsoever or have been subject to misuse or unauthorised repair; or
- b. the Goods have been improperly installed or connected (unless PH carried out such installation and connection); or
- c. the Buyer has failed to observe any maintenance relating to the Goods; or
- d. the Buyer has failed to notify PH of any defect or suspected defect within 14 days of the same coming to the knowledge of the Buyer; or
- e. the Buyer is in breach of this or any other Contract made with PH; or
- f. the Buyer has failed to provide proof of purchase and date of the Goods being put into service.

The cost of dismantling and reassembling the Goods and of returning them to PH for inspection will be borne by the Buyer.

Any Goods replaced will belong to PH. Any repaired or replacement Goods will be guaranteed on these terms for the unexpired portion of the 24 months period.

Save as provided in above PH will be under no liability under the Contract for any personal injury, death, loss or damage of any kind whatsoever (other than death or personal injury resulting from PH's negligence) whether consequential or otherwise including but not limited to loss of profits and PH hereby excludes all conditions, warranties and stipulations express or implied, statutory, customary or otherwise which but for such exclusion would or might subsist in favour of the Buyer except that such exclusion will not apply to

- a. Any implied condition that PH has or will have the right to sell the Goods when the property is to pass; or
- b. When the Buyer deals as a consumer (as defined in Section 12 of the Unfair Contract Terms Act 1977), any implied term relating to the conformity of the Goods within their description or sample or as to their quality or fitness to particular purpose.

In no circumstances will PH or its employees, agents or subcontractors be liable for any loss or damage of any kind whatsoever (other than death or personal injury resulting from PH's negligence) whether consequential or otherwise caused directly or indirectly by any negligence on the part of PH or on the part of any of its employees, agents or sub-contractors in connection with or arising out of the manufacture or supply of the Goods or in connection with any statement given or made

(or advice not given or made) by or on behalf of PH.
