

## YSHIELD® AQUACOND | Sample set | 4x 1 liter

For initial exploratory tests, 1 liter each

---

For initial exploratory tests, 1 liter each. Included in the set:

- YSHIELD® AQUACOND G05 | Graphite dispersion 5  $\mu\text{m}$  | 1 liter
- YSHIELD® AQUACOND G20 | Graphite dispersion 20  $\mu\text{m}$  | 1 liter
- YSHIELD® AQUACOND K40 | Carbon pigment dispersion 40  $\mu\text{m}$  | 1 liter
- YSHIELD® AQUACOND BAC | Pure acrylics dispersion | 1 liter

### AQUACOND mixing system

We have been developing and producing **electrically highly conductive carbon coatings since 2003**. In addition to our globally renowned standard products, we have developed many customized solutions for absorption, plastic coatings, heating applications, textile coatings, and more. This is very time-consuming for us and sometimes not very effective when projects with high development costs and purchase quantities do not match. For this reason, we have developed the AQUACOND mixing system: **Compatible base components can be mixed as desired for individual conductivity applications**. The aqueous dispersions have been developed for maximum compatibility with as many of your usual ingredients as possible.
